NO HARSH CHEMICALS

FORMULATED FOR BABY'S
DELICATE SKIN

PEDIATRICIAN APPROVED

PRODUCT SKU: 6931 | 4 OZ.

Why Choose DNA Miracles™ Natural Diaper Cream?

DNA Miracles Natural Diaper Cream is a natural, non-toxic cream specially formulated to moisturize, soothe and protect your baby's sensitive areas. This cream helps seal out wetness and insulate against irritation to keep your baby's skin soft and smooth-looking.

DNA Miracles Natural is specifically formulated from the best ingredients. Each natural product is designed to gently cleanse, soothe, moisturize and protect your baby's hair and skin without harsh and unnecessary chemicals. DNA Miracles Natural is nontoxic, hypoallergenic, paraben-free and phthalate-free. Each product is pediatrician-approved and gentle enough for everyday use.

How does DNA Miracles Natural Diaper Cream work?

DNA Miracles Natural Diaper Cream combines a natural petrolatum alternative to create a barrier between your baby's skin and irritating wetness, and zinc oxide to soothe baby's skin.

What steps can be taken to avoid irritation on baby's bottom?

There are a number of steps parents can take, including changing diapers promptly, thoroughly pat (not scrub) the skin dry, don't over-tighten diapers, and use a cream or ointment with zinc oxide and petrolatum (or a natural petrolatum alternative) to keep baby's skin in good condition

How do I use DNA Miracles Natural Diaper Cream?

First, gently clean the affected area with mild wipes or a warm wet washcloth. Make sure the affected area is dry before applying the diaper cream. Apply a thick layer of DNA Miracles Natural Diaper Cream with either a clean finger or cotton swab.
