ANTI-AGING NUTRACEUTICALS

PROMOTES HEALTHY VISION

HELPS SUPPORT HEALTHY EYE  
TISSUE AND BLOOD FLOW

PROMOTES HEALTHY  
MACULAR DENSITY

PRODUCT SKU: 13063 | 30 SERVINGS

## Why Choose Prime Vision Eye Health Formula?

The nutrient combination used in Prime Vision Eye Health Formula makes it one of the most powerful eye health supplements available.

Prime Vision's formula is based on the highly recognized and respected AREDS2 study, a multi-year research project identifying the top eye health nutrients to maintain healthy eyes in aging adults. Unlike other vision supplements on the market, Prime Vision contains the same ingredients in identical amounts as those used in the AREDS2 study.

The key ingredient in Prime Vision is FloraGLO® lutein - the first choice for retaining and maintaining eye health. Plus, our eye health supplement consists of additional nutrients - including zeaxanthin, vitamins and bilberry - to help maintain eye health as you age. Other eye health supplements may include these ingredients, but not in the amounts clinically studied and proven effective by AREDS2 researchers.

Among its benefits, Prime Vision promotes healthy vision by helping maintain lens transparency and the structural integrity of cone cells within the eyes. This eye health formula also helps support the health of the cells of the retina and blood vessels while promoting healthy oxygen and nutrient flow to the eyes, while helping to protect them from oxidative stress.

### FloraGLO® Lutein

- Protects the eye from free radicals and supports macular pigment density
- Supports eye health and maintains healthy skin
- Helps maintain healthy visual function

### Zeaxanthin

- Protects the eye from free radicals
- Beneficial for eye health
- Promotes healthy macular density
